Evidence and explanation

▮ **Excessive pauses · 00:01.1–00:31.0 · severity 2**

▲ Rushed pacing · 00:22.5–00:27.5 · severity 1

▲ Rushed pacing · 00:41.5–00:45.2 · severity 1

Excessive pauses

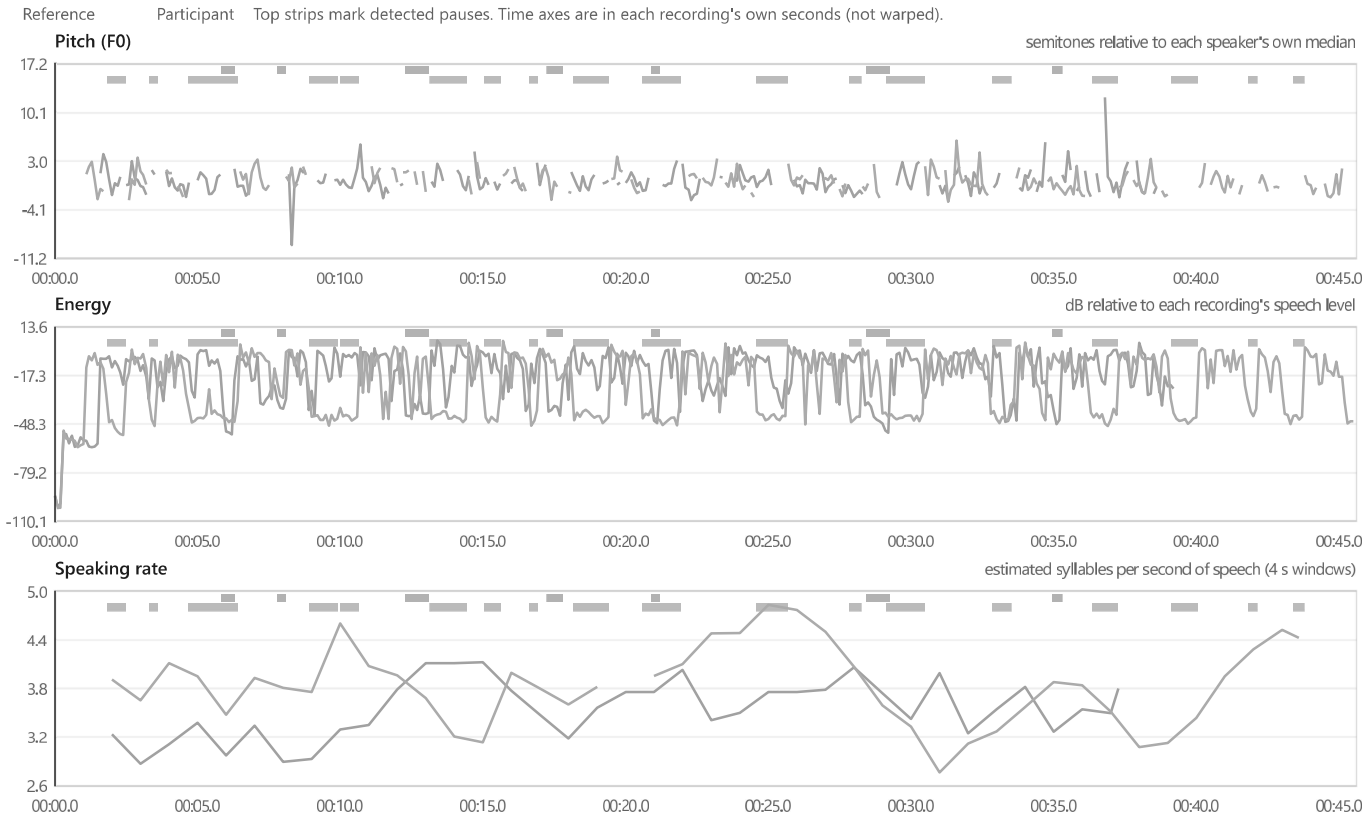

At 00:01.1-00:31.0, 39% of the segment was silent pauses (13 pauses, 11.7s total, longest 1.7s) versus 9% across the reference. This exceeded the threshold of 30%.

Suggestion: Link phrases more smoothly; reserve pauses for sentence boundaries or the key point.

Category	Excessive pauses
Time	00:01.1 – 00:31.0
Severity	2 of 4
Participant	0.39 pause time / segment time
Reference / target	0.09 pause time / segment time
Threshold	0.30
Ratio	4.23
Detection rule	pause_fraction_window(len=8.0s)
Basis	rule-based threshold (uncalibrated)
pause count	13
pause total s	11.69
longest pause s	1.7

Calibrated confidence: not available (rule-based threshold).

Acoustic feature explorer

Measure	Reference	Participant
Articulation rate (syl/s)	3.565	3.846
Pause time (s)	3.48	14.78
Pause fraction	0.0923	0.3347
Median F0 (Hz)	141.7	141.9
Pitch spread (semitones)	1.47	1.52
Energy range (dB)	28.5	29.8
Spectral centroid (Hz)	837	844
SNR estimate (dB)	45.4	44.7

MFCC means over speech frames (c0–c12; for inspection, depends on speaker and microphone)

Transcript and word alignment

Word times are Whisper estimates (typically within 0.1–0.3 s), not forced-alignment boundaries. Highlighted words differ from the other recording (they may be recognition errors rather than reading errors). Click a word to play from it.

Reference

One morning, Rahul was walking to college when he found a wallet near a bus stop. He opened it and saw some money and an identity car

Participant

One morning, Rahul was walking to college. When he found a wallet near a bus stop, he picked it up and opened it carefully. Inside, there w

Rubric report

Operational rubric (weights Pacing 30%, Pauses & fluency 25%, Vocal variation 25%, Emphasis & energy 20%). It measures selected delivery characteristics against this reference; it is not a validated measure of speaking ability.

Strengths

- Pacing (98)
- Vocal variation (100)

Highest-priority improvements

1. **Excessive pauses at 00:01.1:** Link phrases more smoothly; reserve pauses for sentence boundaries or the key point.
2. **Rushed pacing at 00:22.5:** Slow down slightly and add a deliberate pause before key phrases.
3. **Rushed pacing at 00:41.5:** Slow down slightly and add a deliberate pause before key phrases.

How each score was computed

Category	Component	Measurement	Score	Mapping
Pacing	global	articulation_rate_ratio = 1.079	100.0	participant/reference articulation rate; full marks within x1.15, zero at x2.0 (or its inverse)
Pacing	events	n/a	95.1	severity-weighted share of the analysed span covered by flagged events (no double counting)
Pauses & fluency	global	pause_fraction_minus_reference = 0.2424	23.0	extra pause share vs reference; full marks up to +0.05, zero at +0.3
Pauses & fluency	events	n/a	66.1	severity-weighted share of the analysed span covered by flagged events (no double counting)
Vocal variation	global	pitch_spread_ratio = 1.033	100.0	participant/reference pitch spread (semitones); full marks at >= 0.85, zero at <= 0.3
Vocal variation	events	n/a	100.0	severity-weighted share of the analysed span covered by flagged events (no double counting)
Emphasis & energy	global	energy_range_ratio = 1.046	100.0	participant/reference loudness range (p90-p10 dB); full marks at >= 0.85, zero at <= 0.3

Recordings are kept 60 minutes and then removed automatically.

Limitations

- Word times come from Whisper cross-attention (estimates, ~0.1-0.3 s), not a forced aligner; DTW is the fallback.
- Syllable rate is an energy-peak estimate, not a phonetic count.
- A deviation from the reference is not proof of a flaw; the reference is one valid delivery among many.
- Emphasis detection is a heuristic prominence proxy and is expected to produce false positives.
- Pitch/pace norms vary with language, accent, disability and expressive style; the rubric measures selected delivery characteristics only, not overall speaking ability.
